Message from the Guest Editors

In this Special Issue, we would like to address different demands and interactions between linguistics (with a particular focus on phonetics and laboratory phonology research) and computer science. We also aim to provide a state of the art on corpus construction and publication, technological processing of corpora, ecological use of corpora gathered for a specific purpose by other scholars and data sharing in general, and benefits for real-world applications of advances in speech corpus construction and analysis. Special emphasis will be placed on the relevance of multidisciplinary in spoken data creation, analysis and sharing, and on collaborations among different research disciplines. We welcome submissions on advances in speech corpus covering technological and/or linguistic aspects.

Abstract submission deadline: 15 November 2021

Notification of abstract acceptance: 15 December 2021
