Message from the Guest Editor

The relationship between intellectual property, technology, and climate change is of significant importance. This can be seen from activity at the UNFCCC, WIPO and WTO, and the rich and evolving body of scholarship crossing several legal boundaries in private, public, and international fields.

Contributions are welcome that explore intellectual property (IP), technology and climate change in and/or across intellectual property, climate change, innovation, information, trade, human rights, sustainable development, environment, investment, international law and relations, public and constitutional law, philosophy, and also more broadly. Contributions from a variety of perspectives and geographies are particularly welcomed, from researchers at all stages of their careers, and from doctrinal and from qualitative and quantitative empirical approaches. The objective is for each contribution, and for the Special Issue as a whole, to challenge views and build (or resist) new possible frameworks as to the scope and place of IP, climate change, and technology. I would of course be very pleased to speak to colleagues about possible contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Laws is an international, open access journal featuring rigorous scholarship on critical developments in governance, courts, agencies, and social order. Analysis and synthesis, theory and practice, and empirical and doctrinal work have appeared in the journal; contributions that bridge these traditional boundaries are particularly welcome. The social sciences and humanities generate insights both from and for the legal system. While theory grounds *Laws* in a timeless dialogue shaped by traditions of inquiry, legal practice ensures that scholars are addressing pressing problems. Both normative and positive scholarship can aid policymakers, judges, and agency officials. *Laws* brings together the work of theorists and practitioners, and a diverse range of empirical researchers, to promote the progress of foundational legal norms.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), RePEc, vLex Justis, CanLII, Law Journal Library, and other databases.

Journal Rank: JCR - Q1 (Law) / CiteScore - Q1 (Law)
