The Origin of Biomolecules on the Early Earth at Volcanic Hydrothermal Settings

Guest Editors:

Dr. Claudia Huber

Lehrstuhl für Strukturelle
Membranbiochemie, Fakultät
Chemie, Technische Universität
München, Lichtenbergstr. 4,
85748 Garching, Germany

Dr. Christof B. Mast

Systems Biophysics, Physics
Department, Center for
Nanoscience, Ludwig-
Maximilians-Universität
München, Amalienstraße 54,
80799 Munich, Germany

Deadline for manuscript
submissions:

closed (28 July 2023)

Message from the Guest Editors

The formation of biomolecules is an indispensable prerequisite for the emergence of life on Earth.

Concerning the origin of such biomolecules, different habitats and conditions have been discussed in the scientific community, but there is no consensus about even the principal questions: terrestrial origin or initiated through meteoritic impacts, hot or cold origin, and so on.

Volcanic hydrothermal settings on early Earth constitute one of the possible habitats for the formation of biomolecules from inorganic precursors. Metal minerals like iron and cobalt are abundant in Earth's crust and could act as catalytic surfaces in the aqueous environment. Hydrothermal exhalations deliver a constant flow of simple as substrates for the formation of simple organic molecules.

Temperature and pH gradients in hydrothermal fluid flows as well as different bonding strength to the mineral surface allow selectivity and trigger reaction pathways to ever more complex biomolecules.

In this Special Issue we highlight all aspects of biomolecule formation under hydrothermal conditions. Scientific perspectives, research or review articles are encouraged for submission.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
