Message from the Guest Editors

This Special Issue aims to provide a rich mix of original papers, reviews, and case reports on many aspects of understanding, managing, and preventing cardiovascular disease in childhood. Primary care in pediatric cardiology must be concerned with preventing heart disease and detecting existing conditions early. In addition, pediatricians must maintain the vigilance of 'healthy' children to control cardiovascular risk in adulthood. With these goals in mind, the potential topics include, but are not limited to:

- pediatric cardiology;
- congenital heart disease;
- echocardiography;
- congestive heart failure;
- ventricular septal defect;
- pulmonary stenosis;
- coarctation of the aorta;
- atrial septal defect;
- pulmonary hypertension;
- arterial hypertension;
- syncope;
- arrhythmias;
- cardiac transplantation;
- cardiomyopathy;
- pediatric interventional cardiology;
- children;
- newborn;
- cardiac surgery, and family practice for congenital heart disease
