Deadline for manuscript
submissions:
closed (16 March 2023)

Message from the Guest Editor

Dear Colleagues,

Neurogastroenterology, along with oncology and robotics, is expected to see the greatest momentum in innovation and translation in the field of internal medicine. This is particularly linked to the increasing deciphering of the importance of the intestinal microbiome for health and disease. However, the classic areas of neurogastroenterology such as gastrointestinal dysfunction, irritable bowel syndrome, visceral pain perception, and the multiple intersections of "brain-gut interaction" will also help define new areas of individualized precision medicine. In particular, the interaction of the intestinal microbiome and the enteric nervous system and its importance for the genesis of neurodegenerative diseases, such as Parkinson's disease or dementia, is of general interest. However, also technical innovations, such as optogenetic and chemogenetic endoscopic intravital endoscopy open new diagnostic spaces for neurogastroenterology. We invite you to participate in this dynamic discussion with your scientific contributions from the broad field of neurogastroenterology.

Dr. Johannes J. Tebbe

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
