Message from the Guest Editor

Dear Colleagues,

Pulmonary arterial hypertension is life-threatening diseases caused by constriction and remodeling of pulmonary arteries. Prostacyclin, endothelin receptor antagonist, phosphodiesterase 5 inhibitor and soluble guanylate cyclase stimulator is an available for treatment of pulmonary arterial hypertension, which improve hemodynamics and exercise capacity. However, sufficient improvement of long-term prognosis is not achieved in all patients with pulmonary arterial hypertension. New findings from basic research contribute to therapeutic advances of pulmonary arterial hypertension. In this special issue, we focus on basic research in pulmonary arterial hypertension.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
