Deadline for manuscript submissions:

9 May 2025

Message from the Guest Editor

Metabolic dysfunction-associated steatotic liver disease (MASLD) has emerged as the most common chronic liver disease worldwide, currently affecting over 30% of the adult population. It has lately drawn increasing attention due to its prevalence, increased risk of hepatic and extrahepatic outcomes, and its intricate relationships with other metabolic disorders

A better understanding of its pathogenetic mechanisms is essential for the prevention of progression towards the more advanced stages of this disease and improved therapeutic interventions. In addition, the changes of terminology and diagnostic criteria of the metabolic liver disease from NAFLD to MAFLD and then MASLD require the reappraisal of evidence.

This Dual-Section Special Issue will explore a broader range of MASLD-related topics, beginning from epidemiology and pathogenetic mechanisms.

This Special Issue will focus on patient outcomes, disease management strategies, and the translation of basic science discoveries into clinical practice. It will also include papers related to clinical trials, observational studies, innovative treatments, diagnostic techniques, and healthcare policy implications.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona Institute of Science and Technology, 08028 Barcelona, Spain

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
