Deadline for manuscript submissions:

closed (6 January 2023)

Message from the Guest Editor

Dear Colleagues,

There is growing evidence that there are changes that spread beyond the brain in neuronal and psychological disorders. This Life special issue entitled “Brain-Heart Connection. The link between cardiovascular outcomes in neuronal disorders” will collect reviews and original articles of how cardiovascular function is augmented in neuronal disorders. We are particularly interested in reviews capable of covering a wide range of neuronal and psychological disorders. In addition, we seek original research articles that provide clinical and/or mechanistic insight into changes to the cardiovascular system in neuronal and psychological disorders.

This special issue seeks to highlight what we know to date, as well as provide a space for emerging areas of research. The scope of the issue includes, but is not limited to: changes in autonomic tone, changes in excitability and arrhythmia risk, changes to developments of heart failure, and changes in cardiovascular biomarkers.

Dr. Chad R. Frasier

Guest Editor

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
