Deadline for manuscript submissions:

31 March 2025

Message from the Guest Editor

Dear Colleagues,

Breast reconstruction surgery continues to evolve with innovative approaches aimed at optimizing outcomes and patient satisfaction from preoperative planning through to postoperative care. This Special Issue seeks to highlight cutting-edge strategies that address the complexities of breast reconstruction, aiming to reduce complications and enhance aesthetic and functional results.

In recent years, advancements in preoperative diagnostics have revolutionized patient assessment, allowing for personalized treatment plans tailored to individual anatomical and clinical considerations. Techniques such as 3D imaging and virtual surgical planning have enhanced surgical precision and patient outcomes, minimizing risks and improving surgical predictability.

This Special Issue invites contributions that explore these innovative approaches and their implications for advancing the field of breast reconstruction. We encourage researchers and clinicians to submit original research, reviews, and case studies that showcase transformative strategies and outcomes in breast reconstruction.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
