Message from the Guest Editor

Dear Colleagues,

The prevalence of obesity is increasing at an alarming rate and is now recognized as a major contributor to the development of metabolic disorders such as type 2 and gestational diabetes. Excess energy storage as fat in adipocytes is the hallmark of obesity, with adipocytes undergoing cellular hypertrophy and hyperplasia under conditions of a chronic positive energy balance. The accumulation of large adipocytes within white adipose tissue over time in obesity can progressively result in a hypoxic local environment and tissue fibrosis, ultimately leading to reduced adipose tissue plasticity, dysfunction and cell death.

Gestational diabetes (GDM) is characterized by impaired glucose tolerance detected during pregnancy and is associated with maternal and foetal/neonatal complications. Neonates born to GDM pregnancies are at an increased risk of developing diabetes, hypertension and other metabolic disorders later in life, contributing to the already alarming increase in obesity and diabetes. This Special Issue will cover recent advances and research in metabolic disease associated with pregnancy complications.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
