Deadline for manuscript submissions:

20 February 2025

Message from the Guest Editor

Dear Colleagues,

The incidence of chronic inflammatory skin diseases, as well as their comorbidities, is constantly growing. Diseases such as psoriasis, atopic dermatitis, hidradenitis suppurativa, and chronic urticaria are characterized by a complex etiopathogenesis involving genetic susceptibility, environmental factors, immunological dysfunction, and alterations of the epidermal barrier. Their severe forms can be enormously disabling and have a negative impact on the quality of life of the affected patients. The clinical course is chronic–remitting–relapsing, with, therefore, the indispensable need to ensure safe and effective therapies. The study of the complex pathogenetic mechanisms will allow the identification of new therapeutic targets, as well as novel biomarkers with diagnostic significance and predictive value for disease severity and response to therapy.

Dr. Annunziata Raimondo

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
