closed (15 August 2021)

Message from the Guest Editors

Nowadays, a lot of people suffer from moderate and severe hearing loss and other serious hearing impairments, for instance, otosclerosis or sudden sensorineural *hearing loss*. Fortunately, there is also a number of possible methods of treatment, starting from hearing aids and minor surgical procedures, to implantable hearing devices and complicated surgeries. All these otological solutions need to be discussed to improve possible methods of treatment; share personal own experiences; and, as a consequence, provide better healthcare for patients with hearing impairments. Secondly, from random ENT diseases, sinus disorders are common in patients. Therefore, it is important to pay more attention to the diagnosis and treatment of sinus infections, which are often underestimated.

The main aim of the Special Issue is to share knowledge, personal experiences, current strategies and future perspectives and expectations in diagnostic process and treatment of most common otorhinolaryngological diseases, especially in the field of otology and rhinology.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Biology*) / CiteScore - Q2 (*Paleontology*)
