Message from the Guest Editors

Dear Colleagues,

In the past 15 years, multiple articles have appeared that target connective tissue as an important component of treatment in the field of physical medicine and rehabilitation. Despite a growing number of studies, the understanding of the etiopathogenesis of connective tissue dysfunctions remain poorly understood. Therefore, a better understanding of the available data and further investigation of the molecular and biomechanical mechanisms are imperative in order to significantly improve the understanding of the origin of connective tissue dysfunction and the efficacy of its treatment.

We encourage you and your co-workers to submit your articles reporting on this topic. Reviews and original research articles dealing with the anatomical, histological and physiopathological aspects associated with connective tissue dysfunctions in both experimental models and humans are particularly welcome.

Prof. Dr. Antonio Stecco

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
