closed (30 November 2022)

Message from the Guest Editors

The Food and Agriculture Organization (FAO) has been promoting “Edible Insects to Feed the World” since the first international conference in the Netherlands in 2014. In recent years, the use of insects to convert organic waste to protein and fat suitable for feed has attracted attention due to the low cost, short treatment time, and high efficiency of the biological process. Insect biocomposting technology has been developed to treat livestock and poultry manure manures, kitchen waste, soybean residue, straw, and so on. In this Special Issue, we focus on insects and their biocomposting technology. The advances will be presented in understanding the life science of insects and applied science of insect biocomposting technology for biotechnological applications in bioremediation, insect products, greenhouse gas control, and so on.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
