Message from the Guest Editors

Dear Colleagues,

Despite the progress being made in gene and cell therapies, organ transplantation will continue to be the primary treatment option for end-stage organ failure. However, patients still face significant challenges, including a shortage of donor organs and a high risk of acute and chronic graft failure. In this context, this Special Issue will explore recent advancements in the field, including ex vivo organ perfusion, xenotransplantation and the application of regulatory cells such as Tregs and CAR Tregs, with a focus on overcoming or mitigating these shortcomings.

Dr. Robert Ramm

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
