Message from the Guest Editors

Dear Colleagues,

Olfactory and gustatory dysfunctions have proven to be one of the most frequent and specific symptoms of COVID-19.

In this Special Issue of *Life*, we invite researchers from around the world to share their recent research on this topic with us. We are looking for articles that investigate the epidemiological, clinical and pathogenetic aspects of chemosensitive disorders in COVID-19. Furthermore, we are seeking studies on persistent olfactory and gustatory disorders in long-COVID-19, on risk factors for persisting dysfunctions and on the most recent therapeutic advances.
