Message from the Guest Editor

Dear Colleagues,

Psychiatry and psychopharmacology are rapidly evolving on the basis of clinical observations, therapeutic demands, biomarkers, the development of novel drugs beyond the classical paradigms, and, last but not least, challenges from a changing world, creating novel problems in this field.

The aim of this Special Issue is to put together a collection of papers dealing with some of what are considered “hot topics” in the domains of psychiatry and psychopharmacology. Indeed, this Special Issue will include contributions on bipolar disorders, obsessive compulsive disorders, post-traumatic stress disorder, depression, agitation in children, biomarkers in addiction, therapeutic strategies for resistant cases, and new applications and targets of transcranial magnetic resonance.
