### Message from the Guest Editor

Recently, advances in stem cell research and regenerative medicine have provided promising opportunities in the emerging field of “Stem Cell Therapy”, which will be the topic of the upcoming Special Issue of *Life*. The goal of this Special Issue is to report on state-of-the-art research innovations, findings, and developments in stem-cell-based therapies from experts, researchers, and practitioners. The Special Issue will be of interest to a wide-ranging audience, including researchers, scientists, clinicians, and professionals from academia, government, and industry, as well as the public at large. This issue will focus on the use of multipotent and pluripotent stem cells and their derivatives to treat a broad range of diseases and dysfunctions, with a special focus on human degenerative diseases, inflammatory diseases, musculoskeletal dysfunctions, wound repair, and cancers. We welcome submissions of the latest research and reviews on all aspects ranging from cell and molecular biology to clinical trials.
