Deadline for manuscript  
submissions:

**closed (26 June 2023)**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue, “Molecular Signaling in Metabolic Disease”, aims to highlight the up-to-date progress that has shaped the field in recent years. We strive to establish a collection of high-quality articles covering all aspects of human metabolic diseases, such as obesity, type 1 and 2 diabetes, cardiovascular disease, non-alcoholic fatty liver disease, and cancer. Work with strong translational potential is encouraged to shed light on the development of new therapeutic approaches to improve the clinical management of these metabolic disorders.

We invite prospective authors to contribute to the Special Issue hypothesis-driven research generated with the highest standards that paves the way to novel molecular signaling understanding in any aspect of translational and clinical metabolic research. Submissions related to both existing and future therapies or treatment alternatives for metabolic disease, as well as validation of the existing research in addition to investigations into mechanistic exploration that lead to metabolic disorders, are also welcome.

## Message from the Editor-in-Chief

*Life* (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
