Message from the Guest Editors

Despite significant progress in diagnosis and treatment, cancer remains as the biggest challenge of modern medicine. Rapid advancement in molecular technologies and new sophisticated bioinformatic analytic methods have opened novel therapeutic perspectives. It has given new hope for overcoming the major issues associated with drug treatment, such as cancer heterogeneity or multidrug resistance. We cordially invite you to present your outstanding cancer drug-related discoveries in this Special Issue to the wider scientific and academic community.

In this Special Issue, entitled “Molecular Mechanism and Therapeutic Effect of Drugs in Cancer”, we would like to present a collection of articles, such as reviews and systematic reviews, original papers, clinical trials, molecular and bioinformatics studies.

We are looking forward to your submission.

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.
