Message from the Guest Editors

Dear Colleagues,

Following major trauma, outcomes correlates with both appropriateness and timeliness of diagnosis and treatment but, first and foremost, with severity of injury. In fact, a severe trauma almost instantaneously leads to a high level of cell death with the release of debris cell's fragments. These DAMPs (damage-associated molecular patterns) sustain the following cascade and the pathophysiological consequences, structured in the mechanistic insight depicted in the so-called "Danger model". A deep knowledge of these pathomechanisms might be extremely interesting in both predicting the outcome and defining the most therapeutically suitable approach after severe trauma. We are extremely excited to explore all the new findings concerning this field in terms of pathophysiological knowledge, diagnostic and prognostic approaches, and therapeutic strategies.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
