Message from the Guest Editors

e-Health offers new ways to access health information, to deliver health and social care, and to perform self-management, and adoption of e-Health solutions has increased substantially during the last decade.

The scope of this Special Issue is to outline the major challenges and future perspectives of e-Health for health and social care delivery as well as self-management.

The goal of this Special Issue is to provide a forum for researchers to share their latest achievements, covering a diversity of articles and work that reflect the state-of-the-art of e-health issues and challenges.

Topics for the Special Issue include but are not limited to:

- a) Case studies of implementation and development of e-Health policies;
- b) Development and evaluation of citizens use and expectations on e-Health;
- c) Institutional issues that influence e-Health innovation;
- d) Privacy, security and safety in e-Health;
- e) Conceptual papers and systematic literature reviews in relation to decision making around health;
- f) e-Health initiatives to allow patient empowerment;
- g) Tools/technologies facilitating end-users' description of health-related web resources in social networks.
