Message from the Guest Editor

This Special Issue provides an overview of emerging topics on the future perspectives of biochemical modulators acting as selective inhibitors of part of inflammatory and oxidative pathways as well as the appropriate quantification of both redox and inflammatory status before, during, and after antioxidant or anti-inflammatory therapy. For this Special Issue, original research articles, reviews, and short reports on various aspects of antioxidants/anti-inflammatory interdependence in chronic diseases are welcome, in addition to the prediction of future trends in related fields.
