### Message from the Guest Editors

Even though great progress has been made in arterial stiffness research, many questions in this field remain open. Thus, this Special Issue will focus particularly on the study of still-unclarified aspects regarding arterial stiffness, such as pathogenic mechanisms, clinical evaluation and implications, as well as therapeutic strategies.

We cordially invite researchers and practitioners to submit original manuscripts reporting basic and clinical research as well as reviews that address these broad topics.

Deadline for manuscript submissions:

**closed (16 September 2022)**
