Message from the Guest Editors

Atopic dermatitis (AD) is a common skin disease that places a great burden on patients, their families, and society.

The list of potential skin and systemic comorbidities of AD reflects the high burden of the disease, both in affected individuals and in their families, making the development of better interventions even more urgent.

Despite the important advances and the incorporation of new therapeutic weapons that already include atopic dermatitis in their indications, it is still necessary to speed up the diagnostic process and find solutions that meet the expectations of patients and their needs to control itching, achieve skin lightening, and reduce breakouts. Multidisciplinary management and approaches to patients with AD and more well-defined clinical guidelines and protocols are necessary to address, evaluate, and measure this disease.

For all these reasons, this Special Issue aims to contribute to the latest advances in comorbidities and treatments of AD.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
