### Message from the Guest Editor

Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) rapidly spread worldwide, and coronavirus disease-19 (COVID-19) has led to an estimated 6 million deaths worldwide since January 2020. Since its genetic sequence became available, the development and testing of vaccines directed against SARS-CoV-2 has grown at an unprecedented pace. The distribution of vaccines, together with nonpharmacological interventions, has been proven to be the only possible strategy to control the pandemic. As COVID-19 becomes under control and draws to a close, we encourage scholars from all fields to publish research articles on COVID-19 to provide scientific references for future studies.
