Message from the Guest Editors

Dear Colleagues,

The aim of our Special Issue is to collect articles on recent progress in basic research and clinical applications in dentistry. New materials and their applications are of particular interest. Several materials and lights are currently available for use in daily practice. Their interactions with oral tissues can induce, produce or provoke biological effects which may be appreciated or not desired. Thus, fundamental studies or clinical applications in dentistry will contribute to the advancement of knowledge and improve the quality of oral treatments. In the oral environment, there is both hard (bone and teeth) and soft (gingival and mucosal tissues) tissue providing complex functions and aesthetics. Research and clinical studies targeting various oral tissues would enlighten the biological and interactive mechanisms that may potentially improve the quality of treatment for oral conditions and needs. Furthermore, new clinical applications are needed for the evolution and increase in the quality of dental treatments.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
