Message from the Guest Editor

Dear Colleagues,

The human commensal microbiome is a complex and dynamic consortium of microorganisms intricately connected to human physiology in health and disease. The liver is a critical immune organ hosting a wealth of immune cells and processing microbial signals originating from the intestine at the crossroads of the portal and systemic circulations. Understanding the interplay between hepatic immunology and the microbiome has shed new light on the pathophysiology of liver diseases with significant epidemiological relevance. There is a wealth of clinical microbiome studies associating liver diseases with commensal microbial alterations. Of immense importance is the step from high-throughput sequencing establishing correlation to mechanistic studies proving causality and paving the way for therapeutic intervention.

The present collection aims to identify recent advances in the understanding of microbiome-liver interactions in health and disease and its impact on the diagnosis and treatment of liver diseases, providing an up-to-date perspective.

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
