

Special Issue

Development of Genetic Engineering Technologies for Crops

Message from the Guest Editors

This Special Issue on the Development of Genetic Engineering Technologies for Crops published in Life is dedicated to original research or review articles from global researchers on the technologies used to genetically engineer crops. In this Special Issue, we aim to publish high-impact original research and critical reviews by leading researchers in the area of applied plant science, with an emphasis on modern genetic engineering technologies and their applications to improve crops. We aim to provide a forum for the most important advances in this field, including hypothesis- and data-driven studies with the potential for application in plant genetic and genome engineering. To be accepted for publication in this Special Issue, original research papers will need to present new findings with conclusions supported by critical experimental evidence and make a substantial contribution to genetic engineering technologies. Reviews must provide critical high-level insight beyond just a summary of published work. Applications may involve agriculture, horticulture, forestry, biodiversity and conservation, improved foods and food processing.

About the Journal

Message from the Editor-in-Chief

Life (ISSN 2075-1729) is an international, peer-reviewed open access journal that publishes scientific studies related to fundamental themes in life sciences. Some papers are published individually, while others are submitted for inclusion in special issues with guest editors. You are invited to contribute a research article, essay, or a review to be considered for publication.

Editor-in-Chief

Prof. Dr. Lluís Ribas de Pouplana

Institute for Research in Biomedicine (IRB Barcelona), The Barcelona
Institute of Science and Technology, 08028 Barcelona, Spain

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Biology) / CiteScore - Q1 (Paleontology)
