Immunotherapy, University of
Birmingham, Edgbaston,
Birmingham B15 2TT, UK

Deadline for manuscript
submissions:

closed (31 October 2023)

Message from the Guest Editors

This Special Issue aims to provide insight into recent advances in our immunological understanding of acute and chronic liver failure, as well as the identification of new immunotherapeutic targets and interventions. We welcome the submission of original research and review articles. Liver immunology research areas of interest include, but are not limited to, the following:

- Alcohol- and drug-induced liver injury, including acetaminophen-induced acute liver failure;
- Cirrhosis and acute-on-chronic liver failure;
- Non-alcoholic fatty liver disease and non-alcoholic steatohepatitis;
- Insights from new technological advances such as spatial transcriptomics and RNA sequencing.

We look forward to receiving your contributions.
