Deadline for manuscript  
submissions:

**closed (1 February 2023)**

### Message from the Guest Editors

Automation is changing the face of manufacturing in ways previously unimaginable, from extensive production facilities almost entirely driven by robots to small workshops looking to improve a few key manufacturing processes. Fully self-driving plants are still not viable for most manufacturers, but more and more people are embracing automation on a smaller scale that makes sense for their business. This trend towards automation introduced us to a new concept: "Lights-Out." Automation in production, in particular, led to the development of "Lights-Out" manufacturing, which could operate 24 hours a day with minimal staff in the second and third shifts, and the concept was often associated with manufacturing. Considering that the term "Lights-Out" refers to a digitized, automated process that does not involve any human intervention, it can have an impact beyond manufacturing throughout supply chains. Furthermore, Lights-Out Logistics can help supply chains become more resilient in times of great uncertainty and disruption, such as financial crises and pandemics like COVID-19.

## Message from the Editor-in-Chief

I am delighted to take on the editorial role for the open-access international journal *Logistics*, which will emphasize current important issues in logistics and supply chain management. My aim is to ensure that this journal employs a rapid review process; has the flexibility to address the most current topics; and is globally connected, communicating online peer-reviewed articles and related content to a worldwide audience. I have invited a group of leading thinkers to serve as Editorial Review Board Members, who will promote cutting-edge insights from authors from all over the world. Contemporary topics that address current challenges will receive special attention, as will thought-provoking scholarly essays and viewpoints. On behalf of our distinguished Editorial Board, I welcome your contributions.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, ESCI (Web of Science), RePEc, and other databases.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.7 days after submission; acceptance to publication is undertaken in 8.7 days (median values for papers published in this journal in the first half of 2024).
