Message from the Guest Editors

This Special Issue aims to share the advances in tribological behaviors under typical extreme situations, high-performance aerospace tribological components, advanced tribometers for studying aerospace components, and other novel aspects in the field of Aerospace Tribology. It covers typical tribological components in aerospace equipment, materials, coatings, surface engineering, and tribological devices. Both experimental and theoretical investigations are highly welcome.

Deadline for manuscript
submissions:

31 December 2024
