

# Special Issue

## Tribological Behavior of Metal Coatings

### Message from the Guest Editors

The tribological behavior of metal coatings is a Special Issue of *Lubricants* dedicated to spreading quality scientific contributions on the tribological behavior of hard metal coatings obtained by PVD, CVD, plasma-assisted and electroless processes, among others. In this Special Issue, the tribological fundamentals of nitrides, carbon nitrides and titanium aluminum nitrides in the machining and forming process are of interest. Research reports on coatings obtained by plasma spray and related techniques for highly abrasive applications, and investigations of coatings' phase transformation induced by friction and temperature, are welcome. Manuscripts on the relation among coatings' microstructure, mechanical behavior and tribological performance are encouraged to be submitted.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Homer Rahnejat  
School of Engineering, University of Central Lancashire, Preston PR1  
2HE, UK

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec,  
CAPlus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2  
(Mechanical Engineering)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 14.6 days after  
submission; acceptance to publication is undertaken in 2.5  
days (median values for papers published in this journal in  
the second half of 2024).
