Message from the Guest Editors

Dear Colleagues,

The emergence of robots has brought great convenience to people's lives in the fields of manufacturing, assembly, rehabilitation, assistance, and others. As an interplanetary topic, the blossoming of robots involves advances in electronics, mechatronics, control engineering etc. Motion planning and control problems are essential in robot development for achieving optimal movement and interaction with the environment and/or humans.

This Special Issue intends to cover recent developments in robotics regarding motion planning and control that are related to dynamic modelling, path planning, machine learning, optimization, model-based control, robot navigation, human-machine interfaces etc., such that safe and reliable operation can be achieved.

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Control and Optimization)
