submissions:

30 April 2025

Message from the Guest Editor

Dear Colleagues,

Nowadays control systems are entering the new era of Industry 5.0, with digital and green transitions, as well as of the approaching Industry 6.0, supported by the intelligence. The abilities of humans and machines become integrated to gain the best possible outcome. In this context, control systems take on a new meaning.

This Special Issue is dedicated to interdisciplinary research in the area of industrial control systems, especially connected, but not limited, to Industry 5.0 and Industry 6.0. It is calling for cutting-edge contributions to fundamental theoretical research as well as its application in the practice.

- control systems
- industrial systems
- industry 4.0
- intelligent control

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Control and Optimization)
