

## **Design and Control of Electrical Machines II**

Guest Editors:

**Prof. Dr. Fu-Cheng Wang**

**Dr. Yi-Liang Yeh**

**Dr. Yu-Hsiu Lee**

**Dr. I-Haur Tsai**

Deadline for manuscript  
submissions:

**31 October 2024**

### **Message from the Guest Editors**

Dear Colleagues,

Following the success of the previous Special Issue “Design and Control of Electrical Machines” , we are pleased to announce the next in the series, entitled “ Design and Control of Electrical Machines II”.

This Special Issue focuses on the advances related to electrical machines, such as novel designs; novel control strategies; and new technologies including WSNs, IoT, artificial intelligence, new applications, etc. Papers related to electrical machines in this field are most welcome. Topics of interest for publication include, but are not limited to:

- Novel design of electrical machines.
- New system architectures and technologies.
- Electric vehicles, including land, sea, and air vehicles.
- Applications of electrical machines.
- Modelling and control of electrical machines and systems.
- Power devices and systems.
- Advanced control and optimization algorithms for electrical power systems.
- Application of WSNs, IoT, and artificial intelligence in electrical machines and systems.

an Open Access Journal by MDPI

## **Message from the Editor-in-Chief**

*Machines* is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within *Scopus*, *SCIE (Web of Science)*, *Inspec*, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Mechanical*)
