Prof. Dr. Ibrahim Tansel

Department of Mechanical Engineering, Florida International University, Miami, FL 33199, USA

Deadline for manuscript submissions:

closed (30 November 2023)

Message from the Guest Editors

Dear Colleagues,

We are pleased to announce this Collection titled “Editorial Board Members’ Collection Series: Additive Manufacturing”, which will collect papers invited by the Editorial Board Members.

Additive manufacturing technologies are rapidly changing manufacturing industrial fields in terms of how products are designed and manufactured. They allow for the creation of complex designs with less material wastage when compared to parts that require machining, as well as allowing for the creation of lighter structures.

The aim of this Collection is to provide a venue for networking and communication between *Machines* and scholars in the field of additive manufacturing. All papers will be fully open access upon publication after peer review.

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Control and Optimization)
