### **Message from the Guest Editor**

Dear Colleagues,

2018 The 6th International Conference on Control, Mechatronics, and Automation (<http://www.iccma.org>) will be held in Tokyo, Japan on October 12–14, 2018. It is supported by the International Association of Computer Science & Information Technology.

Bearing in mind the significance of mechanical control, intelligent mechatronics, and automation, in general, this Special Issue focuses on the recent development of various fields or cross-fields of related topics, and it represents a good opportunity for researchers around the world to disseminate different aspects of their work.

Suitable topics include, but are not limited to, the following:

- intelligent mechatronics
- robotics
- biomimetics
- automation
- control systems
- manufacturing process

## Message from the Editor-in-Chief

*Machines* is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Control and Optimization)
