

Advanced and Efficient Electric Propulsion Systems

Guest Editors:

Dr. Amin Mahmoudi

College of Science and
Engineering, Flinders University,
Adelaide 5042, Australia

Dr. Solmaz Kahourzade

SREM, University of South
Australia, Adelaide 5042,
Australia

Deadline for manuscript
submissions:

closed (15 November 2023)

Message from the Guest Editors

This Special Issue concentrates on the most recent technology and developments in the design and manufacturing processes of HEV and EV propulsion systems. The Special Issue's main goal is to provide a broad platform for reporting the scientific research observations on the following areas:

- Design with respect to EV and HEV driving cycles;
- High-power-density electric motors;
- Alternative batteries and energy storage systems for EVs and HEVs;
- Simulation approaches and techniques for propulsion system design and optimization;
- Propulsion system safety and reliability.

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Control and Optimization)
