

Electric Vehicle Powertrains: Design, Development and Technology

Guest Editors:

Dr. Tianfu Sun

Prof. Dr. Xin Zhang

Prof. Dr. Weinong Fu

Prof. Dr. Kai Wang

Deadline for manuscript
submissions:

closed (30 June 2022)

Message from the Guest Editors

This Special Issue will accept contributions describing innovative research and developments in “Electric Vehicle Powertrains: Design, Development, and Technology”. It will cover a wide range of disciplines, including techniques of key components in EV powertrains, EV powertrain system integration, vehicle-to-grid techniques, energy storage and conversion techniques, power electronics and power semiconductors, etc. All the methodologies and techniques related to the EV powertrain are welcome.

The proposed Special Issue particularly fits the following topics within the scope of MDPI’s *Machines* journal:

- Advanced design and control of electric machines;
- Energy storage and conversion techniques;
- Design and development of electric vehicle powertrains;
- Vehicle-to-grid and smart grid techniques;
- Power electronics and power semiconductors;
- Power systems, simulation, and optimization;
- Fault diagnosis and tolerance of power systems;
- Automatic pilots related technologies in EV powertrain developments.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Control and Optimization)
