

Advanced Control of Industrial Electro-Hydraulic Systems

Guest Editors:

Prof. Dr. Zheng Chen

The State Key Laboratory of Fluid Power and Mechatronic Systems, Zhejiang University, Hangzhou 310027, China

Prof. Dr. Litong Lyu

School of Mechanical Engineering, Shijiazhuang Tiedao University, Shijiazhuang 050043, China

Deadline for manuscript submissions:
closed (30 June 2022)

Message from the Guest Editors

The aim of this Special Issue is to bring together recent studies on the advanced control of electro-hydraulic systems. Control of hydraulic multi-DOF manipulators, intelligent/data-driven control, in-depth system modelling/analyses, smart power management, and precise motion/force control are particularly encouraged, and contributions with industry applications are welcome. Prospective authors are invited to submit original contributions, including review papers, for this Special Issue.

We look forward to receiving your contributions.

Prof. Dr. Zheng Chen

Prof. Dr. Litong Lyu

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank: JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Control and Optimization)
