# **Special Issue**

# Spin-Crossover Beyond the Immediate Tribute

# Message from the Guest Editors

Borders are the melting pot of cultural effervescence; they are also places of perdition where danger lurks. This observation applies to science; it is indeed often at the borders of well-recognized scientific fields that ideas and major improvements take place, even though care must be taken not to get lost in the background. Spin-crossover (SCO) is a topic that is truly located at the crossroads of a wide variety of approaches and characterization techniques, a large panel of research fields and communities, as well as diverse targets ranging from fundamental guestioning to practical developments. Consequently, working on the SCO phenomenon can potentially lead to advancements in knowledge and know-how that turn out to be relevant in other, sometimes unanticipated scientific fields. This Special Issue is therefore devoted to Spin-CrossOver, focusing on the promotion of its multi-disciplinary aspects, and providing authors with a place to present their latest discoveries and the opportunity to offer a tribute beyond their usual audience.

# Editor-in-Chief

Prof. Dr. Carlos J. Gómez García Department of Inorganic Chemistry, Faculty of Chemistry, University of Valencia, C/Dr. Moliner 50, 46100 Burjasot, Valencia, Spain

## **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

## Journal Rank:

JCR - Q2 (Chemistry, Inorganic and Nuclear) / CiteScore - Q2 (Chemistry (miscellaneous))

## **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.8 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2024).
