Deadline for manuscript
submissions:
closed (31 October 2018)

Message from the Guest Editor

Dear Colleagues,

In this special issue, we aim to highlight the strength of the contributions that have been made by women in machine learning research and to give a special publication opportunity to these women. The key requirements for consideration for publication are:

- A female-identifying first author -*OR*- a female-identifying senior author (e.g. group/laboratory head); both would be great, and an all-female author list even better.
- Topics may include
  - original machine learning methods, or
  - novel applications of machine learning methods.

All submissions will be rigorously peer-reviewed. The Article Processing Charge (APC) for publication of the manuscripts will be waived for accepted manuscripts submitted to this issue.

We are looking forward to receiving your contribution.

Prof. Karin Verspoor
