Message from the Guest Editor

Dear Colleagues,

Oxidative stress has been known as one of the major causes of many devastating diseases, including cancer, heart attack, liver cirrhosis, Alzheimer's disease, and Parkinson's disease. Many marine natural products have been extensively studied for their antioxidative properties as potential pharmaceutical remedies. Compared to land natural products, marine products may have distinct profiles, including different compositions and biological natures. Given your strong dedication and extensive research experience with marine natural products, we would greatly appreciate your contribution to this Special Issue on "Application of Marine Nature Products to Reduce Oxidative Stress". I truly believe that your involvement in this Special Issue will have a tremendous impact on marine natural product research.

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Embase](#), [PubAg](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
