## The Application of Marine Alkaloids and Related Analogues

Guest Editors:

### **Prof. Dr. Patrizia Diana**

Department of Biological  
Chemical and Pharmaceutical  
Sciences and Technologies  
(STEBICEF), University of  
Palermo, Via Archirafi, 32-90123  
Palermo, Italy

### **Prof. Dr. Gunhild von Amsberg**

Laboratory of Experimental  
Oncology, Department of  
Oncology, Hematology and Bone  
Marrow Transplantation with  
Section Pneumology, Hubertus  
Wald-Tumorzentrum and Martini  
Clinic, University Medical Center  
Hamburg-Eppendorf, 20246  
Hamburg, Germany

Deadline for manuscript  
submissions:

**closed (31 October 2020)**

### **Message from the Guest Editors**

The marine environment is an inestimable source of novel chemical entities that have shown potential as bioactive drugs. In fact, many marine-derived molecules, with their wide range of biological activities, find different applications as antitumor, anti-inflammatory, antibacterial, and antiviral agents. In particular, marine alkaloids represent a very promising class of compounds due to their potent activities and their extensive structural heterogeneity. The success obtained so far, which is based on a very limited investigation of both deep-sea organisms and marine microorganisms, suggests a high potential for further discovery of new alkaloid drugs.

This Special Issue, dedicated to the "The Application of Marine Alkaloids and Related Analogues", aims to present an updated overview and to emphasize the importance of the study of marine-derived alkaloids, reporting new results about their isolation, structural characterization, chemical synthesis, biological and pharmacological evaluation. As the Guest Editors, we invite scientists in the fields of chemistry, biochemistry, pharmacology, and toxicology to submit articles on their most recent work.

## Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Embase](#), [PubAg](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
