Message from the Guest Editor

Dear Colleagues,

In the last two decades, a large screening of marine compounds has been conducted and a wide range of activities, such as anti-inflammatory and/or anti-oxidant activities, have been reported. This supported the development of a recent discipline named marine pharmacology, which investigates the sea milieu looking for potential new pharmaceuticals.

These findings have established that such marine compounds have potential promising vascular bioactivities, which may trigger the discovery of new drugs for cardiovascular diseases, generally found in elderly people.

In this Special Issue we invite researchers to contribute original articles that address primary and secondary metabolites of marine origin with vascular bioactivities, which can be used either as supplements or marine natural products, but also as potential drugs that can delay the morbidity and mortality of related cardiovascular disorders.

As Guest Editor, I invite you to contribute to the Special Issue on the “Vascular Bioactivities of Marine Natural Products”. Original research reports and reviews will be published online in *Marine Drugs*.

Prof. Assunta Pandolfi

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Embase](#), [PubAg](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
