Message from the Guest Editor

Dear Colleagues,

Fungi from marine habitats continue to provide a prolific resource for natural product discovery. Current research in marine fungal natural product discovery focuses on topics ranging from the isolation of new fungal taxa to the isolation and characterization of new compounds. Additionally, with the growing awareness of the presence of cryptic natural products in fungal genomes, efforts are underway in numerous labs to develop new methods to induce the expression of such compounds. The goal of this *Marine Drugs* Special Issue is to assemble a collection of research articles outlining progress in these interrelated disciplines.

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Embase](#), [PubAg](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
