California, San Francisco, CA,
USA

Deadline for manuscript
submissions:

closed (31 December 2021)

Message from the Guest Editor

Dear Colleagues,

Angiogenesis is a process by which new blood vessels are produced from the existing blood vessels, and it plays an important role in development and tissue regeneration. However, uncontrolled angiogenesis can cause various diseases including coronary artery disease, stroke, age-related macular degeneration, rheumatoid arthritis, cancer, etc. Marine natural products have been considered a valuable source for drug discovery because of their chemical diversity and biological activities.

Manuscripts/reviews regarding marine natural products with anti/pro-angiogenic activities will be invited.

Dr. Donghwa Kim

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Embase](#), [PubAg](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
