### Message from the Guest Editor

**The H2020-MSCA-ITN-ETN: MarPipe** is a Research and Training Network program of 11 academic and industrial partners based in eight European countries working in collaboration to train young researchers in the field of marine drug discovery.

The **H2020-MSCA-RISE: Ocean Medicines** is a network of academic research centers and SMEs across Europe, with proven experience in higher education and training, and is endowed with state-of-the art scientific and technical expertise and infrastructures, aimed at hosting a new generation of marine biodiscovery scientists from developing a new drug to its commercialization, innovation, and possibilities of entrepreneurship.

## Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.
