Deadline for manuscript submissions:

closed (30 September 2014)

Message from the Guest Editor

Dear Colleagues,

The last review published on marine-derived terpenoids was in 2006. It is about time to collate and update the work done on this group of compounds in the last decade. This special issue will focus on the chemistry of terpenoids from diverse marine sources ranging from sponges, soft corals, molluscs, and other marine invertebrates. This will also include studies done on their biosyntheses, ecological significance, and biological activity.

Dr. RuAngelie Edrada-Ebel Guest Editor

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, MarinLit, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
